**Summary** — Aspiring Full Stack Developer and BCA student with a strong foundation in Frontend Development and Data Structures & Algorithms. Skilled in building responsive and interactive web applications using HTML, CSS, JavaScript, Tailwind CSS, and Python. Currently expanding expertise in React, Node.js, and MongoDB while gaining practical experience through projects and internships. Passionate about creating scalable and user-centric digital solutions.

## Skills

**Frontend** React.js, Next.js, JavaScript,  
**Backend** Node.js, Express, MongoDB,  
**Languages** - JavaScript, Python

**Design** - Figma  
**Others** - GSAP

## Experience

### Web Development Intern | Cod Soft

Oct 2025 – Present

*Full Stack Developer*

- Selected for the Web Development Virtual Internship Program at Cod Soft, focusing on practical application of modern web technologies.
- Developed and implemented multiple web-based projects, enhancing proficiency in HTML, CSS, JavaScript, and responsive design principles.
- Strengthened problem-solving abilities and gained hands-on experience in translating requirements into functional and user-friendly solutions.
- Applied industry best practices to build efficient, maintainable, and scalable front-end components.
- Collaborated on project assignments while improving debugging, code optimization, and development workflows.
- Expanded knowledge of modern web development concepts and gained exposure to real-world software development practices.
- Demonstrated adaptability, self-learning, and commitment to delivering high-quality solutions within project timelines.

## Education

### Sage University Bhopal

*Bachelor of Computer Applications (BCA - AI & Data Science)*

## Achievements

### Career Highlights

2025 - Present

- Selected for Web Development Virtual Internship at Cod Soft.
- Actively learning MERN Stack Development.
- Strong interest in Data Structures and Algorithms.
- Building projects to strengthen full-stack development skills.

## Projects

### Productivity Dashboard | Personal Productivity Web Application

Mar 2022 – Jul 2023

- Designed and developed a feature-rich productivity dashboard to streamline daily planning and task management.
- Integrated real-time clock, date, and weather information based on location for an enhanced user experience.
- Implemented modules including To-Do List, Daily Planner, Pomodoro Timer, Goal Tracking, and Motivation Hub.
- Developed a customizable theme system with immersive full-screen support and a modern responsive UI.
- Focused on improving productivity through intuitive design and interactive user experiences.
- Applied modern front-end development practices to create a visually appealing and highly functional application.
- Technologies Used: HTML5, CSS3, JavaScript, Local Storage APIs, Weather API.
